### Solar Suppliers

Sunpower

Solar World

Velux

Echo™ First

Conergy

Gexpro

Platt Electric

Russell Pacific

## DWELLTEK TESTIMONIALS

*"When Garbett Homes made the decision integrate solar energy as standard equipment on all of our homes it was important for us to partner with a company that was more than just a solar contractor. We needed to align with a company that understands building science, understands what the Home Energy Rating System (HERS) is and understands customer service.*

*DwellTek has done an excellent job of meeting the daily demands of Garbett Construction in a professional and timely manner. They also provide our home buyers with a solar orientation that explains how the system works, how to read the monitor, explain the tax credits and incentives as well as train our sales staff on how to explain solar to potential home buyers. In short, DwellTek has been a true partner in every sense of the word."*

**RENE OEHLERKING - MARKETING DIRECTOR, GARBETT HOMES**

*"It looks like our 12 panels will produce about 4 megawatts of power in their first year. We are proud of that contribution. We are exceeding the estimates that we were given before we bought the system. It has been a good experience so far."*

**SALLY AND TORCH ELLIOTT**
